👤 Profile

Detail-oriented final-year Computer Science student at BRAC University preparing for a software engineering role. Strong foundation in programming, databases, full-stack development, and applied machine learning, with hands-on experience building web applications, data-driven systems, and IoT solutions. Comfortable working across requirements analysis, implementation, debugging, testing, and documentation, with a focus on writing reliable, maintainable software.

🎓 Education

B.Sc. in Computer Science & Engineering	2022–2026
BRAC University, Dhaka	CGPA: 3.45/4.00
Higher Secondary Certificate, Science	2020
Dhaka City College, Dhaka	GPA: 5.00/5.00
Secondary School Certificate, Science	2018
Govt. Laboratory High School, Dhaka	GPA: 5.00/5.00

🔧 Technical Skills

🔗 Languages	Python, SQL
📊 ML/Data	NumPy, Pandas, Matplotlib, Scikit-learn
🧠 Deep Learning	TensorFlow/Keras; CNN, RNN, LSTM, GRU, Transformer
🗄️ Databases	MySQL, MongoDB
🔧 Tools	Git, Jupyter Notebook, VS Code, Overleaf
💡 Interests	Machine Learning, NLP, Computer Vision, IoT, Swarm AI

📁 Projects

Doctor Handwriting Recognition	2026
Python, TensorFlow/Keras, DenseNet121, MobileNetV3, ResNet50, ViT-B16, CNN-Transformer	
- Benchmarked five deep learning architectures for physician prescription handwriting classification. - Built the full pipeline for image preprocessing, model training, evaluation, and cross-model comparison.	
News Headline Text Classification	2025
Python, Scikit-learn, TensorFlow, SimpleRNN, LSTM, GRU, Logistic Regression, DNN	
- Evaluated 24 configurations across preprocessing, representation, and model choices for multi-class classification. - Achieved best F1 score of 0.9276 using Bidirectional GRU and documented results in an IEEE-format report.	
A.Q.U.A.: Aquarium Automation System	2025
Arduino Uno R3, ESP8266, IoT Sensors, Embedded C	
Developed an IoT-enabled aquarium automation system with scheduled feeding, water management, and WiFi control.	
Partner Matching Web Platform	2024
Laravel, PHP, MySQL	
Built a full-stack compatibility-based matching application with user profiling and a relational database backend.	
E-Commerce Platform	2025
MongoDB, Express, React, Node.js	
Created a MERN e-commerce application with listings, authentication, cart features, and a NoSQL backend.	

📖 Undergraduate Thesis

Decentralized Bio-Inspired Multi-Agent / Swarm Coordination and Emergency Protocols for Electric Vehicles
👤 Supervisor: Dr. Khalilur Rahman, BRAC University ⌚ Status: In Progress
Proposes E³-Hybrid Swarm Routing, combining ACO, PSO, and BCO for adaptive decentralized EV emergency routing in urban environments.

🗣️ Languages

🗣️ Bangla: Native | English: Proficient (Academic & Professional)
